MOLD PREVENTION ADDENDUM

TENANT(
LEASED P

2558 Aisquith Street Baltimore, MD 21218

It is Landlord's objective to maintain the highest quality building environment for any and all Tenants. You are hereby notified that mold can grow if the Leased Premises that is not properly maintained and ventilated. If moisture is allowed to accumulate in the building, it can cause mildew and mold to grow. It is important that Tenants frequently allow air to circulate in the Leased Premises. It is also important that Tenants keep the inside of the Leased Premises clean and that you promptly report to the Landlord any leaks, moisture problems, and/or mold growth. The following are possible causes of indoor moisture problems: Humidifiers, steam from cooking, wet clothes, leaky roofs or windows, house plants, shower/bath steam and leaks, constant running water/plumbing leaks, and backed up sewers, overflows, or flooding.

Tenant is responsible for maintenance of the Leased Premises in a manner that prevents the occurrence of the existence of mold or mildew in the Leased Premises. Tenant agrees to uphold this responsibility in part by complying with the following list of responsibilities.

Tenant shall keep the Leased Premises including but not limited to all counter and floor surfaces, windows and windowsills, free of dirt and debris that can become a haven for mold and mold growth.

Tenant shall immediately report to Landlord any water concerns, such as running faucets, roof leaks, plumbing leaks, drips, sweating pipes, or discoloration of walls and/or ceilings.

Tenant shall immediately notify Landlord of water overflowing from bathrooms, kitchen, or laundry and whether overflow was a result of the condition of the Leased Premises or from Tenant accident or misuse.

Tenant shall instantly report to the Landlord any mold growth whatsoever on any surface inside the Leased Premises.

Tenant shall allow the Landlord to enter the Leased Premises to inspect and make necessary and/or agreed upon or desired repairs. Tenant shall use bathroom fans, if available, in their units while showering or bathing, and to report to the Landlord any non-working fan. If a fan is not provided in your bathroom(s) you shall use the window for ventilation of steam during and after showers, bathing, and use of water.

Tenant shall use exhaust fans whenever cooking, dishwashing, or cleaning. Tenant shall leave on or open the ventilation until all steam, whether in bathroom or other areas of the Leased Premises, is gone.

Tenant shall use all reasonable care to close all windows and other openings in the Leased Premises to prevent outdoor water (i.e. rain, sprinklers, etc.) from gaining access into the inside of the Leased Premises.

Tenant shall clean and immediately dry any visible moisture on the surface of windows and/or window frames as well as on any other surfaces including personal property. As an example, due to weather conditions inside and outside some homes, the interior surface of windows and surfaces may "sweat" or become wet due to excessive use of water in the home, laundry being permitted to dry inside, cooking, etc. This water should be removed from the surface of windows immediately so that if the Landlord inspects the Leased Premises, no accumulation of the dirt and debris at the bottom of windows and on windowsills should ever be seen.

Tenant shall immediately notify the Landlord of any problems with the air conditioning, if any, or heating system problems that are discovered by Tenant. Further Tenant shall immediately report both verbally and in writing any potential mold causing conditions to the Landlord or the Landlord's authorized Agent.

Tenant shall inspect beneath cabinets, vanities, sinks, closets, and areas near indoor plants frequently as to determine whether there are any leaks or excessive moisture.

If the Tenant violates any part of this Addendum, the Tenant will then be in default of the Lease. In the event of a default, the Landlord may initiate legal proceedings in accordance with all applicable MD and local regulations to evict or have the Tenant removed from the Leased Premises; as well as seek judgment against the Tenant for any monies owed to the Landlord as a result of the Tenant's default. SMOKE-FREE PROPERTY ADDENDUM

Landlord

Leased

2558 Aisquith Street Baltimore, MD 21218

This Smoke-Free Property Addendum is incorporated into the Lease (the "Lease") executed by and between SMD Management LLC (Landlord) and the [REDACTED] (Tenant) for the Leased Premises located at [REDACTED].

The Landlord has implemented a "No Smoking" policy due to the known health effects of secondhand smoke, increased costs incurred due to additional maintenance and cleaning, fire risks, and higher insurance costs associated with permitted smoking in the building.

For this Smoke-Free Property Addendum, smoking is defined as inhaling, breathing, or carrying and lit cigarette, cigar, pipe, vape device, or other tobacco or non-tobacco smoked product in any form, legal and illegal.

The Tenant(s), occupants, and Tenant's invitees and guests acknowledge the Leased Premises are designated as a smoke-free living space. No smoking anywhere within the rental unit is permitted. Where applicable, smoking shall not be permitted in any common areas, including but not limited to hallways, adjoining grounds, balconies and/or patios.

Tenant(s) acknowledges that the Landlord does not promise or guarantee of smoke-free living space. Additionally, Tenant(s) acknowledges that Landlord's implementation of smoke-free living space does not make the Landlord responsible for the Tenant's health or of the smoke-free condition of the Tenant's unit and the common areas.

However, Landlord will try to enforce the terms within this Smoke-Free Property Addendum with the Lease to create a smoke-free environment.

Tenant accepts that Landlord has limited ability to police, monitor, or enforce the terms of this Smoke-Free Property Addendum. Tenant understands enforcement depends upon the compliance of the Tenant(s), occupants, Tenant's guests, and invitees. Landlord puts on notice any Tenant(s) with respiratory illnesses, diseases, allergies, or any other physical or mental condition relating to the effects of smoke that the Landlord assumes no greater duty of care to enforce this Addendum than any other landlord obligation under the Lease.

If the Tenant violates any part of this Addendum, the Tenant agrees to pay a fee of \$450 as a reasonable estimate of damages incurred by the Landlord.

If the Tenant violates any part of this Addendum, the Tenant will then be in default of the Lease. If a default occurs, the Landlord may initiate legal proceedings under all applicable laws and regulations to evict or have the Tenant removed from the Leased Premises and seek judgment against the Tenant for any monies owed to the Landlord because of the Tenant's default.

Resident Benefits Package Lease Addendum

Landlord: [REDACTED]

Tenant: [REDACTED]

Leased Premises:

2558 Aisquith Street Baltimore, MD 21218

The [REDACTED] Resident Benefits Package (RBP) delivers savings and convenient, professional services that make taking care of your home second nature at a cost of \$75/month, payable with Rent. Tenant and Landlord mutually agree that the Resident Benefits Package is defined as follows and variations of inclusions may exist due to property specifications. The total monthly cost of the Resident Benefits Package is all-inclusive, and no discounts will be given if any element(s) of the package are unavailable due to a lack of HVAC or other property-specific limitations, unless otherwise specified below.

HVAC Filter Delivery: A portion of Tenant's total amount due will be used to have HVAC filters delivered to their home approximately every 90 days, or as required by your HVAC system. Tenant shall properly install the filter that is provided within two (2) days of receipt. Tenant hereby acknowledges that the filters will be dated and subject to inspection by Landlord upon reasonable notice to verify replacement has been timely made. If at any time Tenant is unable to properly or timely install a filter, Tenant shall immediately notify Landlord in writing. Tenant's failure to properly and timely replace the filters is a material breach of this agreement and Landlord shall be entitled to exercise all rights and remedies it has against Tenant and Tenant shall be liable to Landlord for all damages to the property or HVAC system caused by Tenant's neglect or misuse. Landlord may charge a trip fee to perform the filter change, as required, at Tenant expense. Tenant acknowledges that if the property does not have an HVAC system, there will be no filter(s) provided and there is no discount to the overall Tenant cost of the package.

Move-in Concierge Service: Tenant acknowledges that Landlord will make available a concierge service to Tenant to aid in utility, cable, internet, and other relevant service(s) activation. Tenant maintains the right to facilitate his/her own service activations. Tenant agrees to abide by all HOA and other lease restrictions and guidelines applicable to utilities.

Renters Insurance Requirements & Program:

The Landlord requires Tenant obtain liability coverage of at least \$100,000 in property damage and legal liability from an A-rated carrier and to maintain such coverage throughout the entire term of the lease agreement. Tenant is required to furnish Landlord evidence of the required insurance prior to occupancy, at the time of each lease renewal period, and upon request.

To satisfy the insurance requirement, Tenant may either (1) be automatically enrolled into a policy that satisfies the coverage requirements as part of the Resident Benefits Package; or (2) obtain alternative liability coverage from an insurer of Tenant's choice. The option Tenant chooses will not affect whether Tenant's lease application is approved or the terms of Tenant's Lease.

Option 1: Do nothing. Tenant will be automatically enrolled into an insurance policy as part of the Resident Benefits Package. No further action is required. Coverage will begin on the effective date of Tenant's lease and continue throughout the lease term. Please refer to the evidence of insurance that is supplied by SMD Management for additional coverage details. The Resident Benefits Package monthly rate will be adjusted by the premium amount in the policy.

Option 2: Buy a policy. If Tenant prefers, Tenant may find, purchase, and maintain another policy that satisfies the Landlord's requirements. The Resident Benefits Package monthly amount will be adjusted accordingly. Visit <http://insurance.residentforms.com/> and follow the instructions listed there to provide evidence of the required insurance coverage to your Landlord.

Please be sure that your policy meets the following criteria prior to submitting:

[REDACTED]

Rewards are to be accessed online and are activated at Tenant’s sole discretion through use of a mobile application provided by the rewards provider. Protect Your Family From Lead in Your Home

September 2013

Are You Planning to Buy or Rent a Home Built Before 1978?

Did you know that many homes built before 1978 have **lead-based paint**? Lead from paint, chips, and dust can pose serious health hazards.

Read this entire brochure to learn:

- How lead gets into the body
- About health effects of lead
- What you can do to protect your family
- Where to go for more information

Before renting or buying a pre-1978 home or apartment, federal law requires:

- Sellers must disclose known information on lead-based paint or lead-based paint hazards before selling a house.
- Real estate sales contracts must include a specific warning statement about lead-based paint. Buyers have up to 10 days to check for lead.
- Landlords must disclose known information on lead-based paint and lead-based paint hazards before leases take effect. Leases must include a specific warning statement about lead-based paint.

If undertaking renovations, repairs, or painting (RRP) projects in your pre-1978 home or apartment:

- Read EPA's pamphlet, *The Lead-Safe Certified Guide to Renovate Right*, to learn about the lead-safe work practices that contractors are required to follow when working in your home (see page 12).

Simple Steps to Protect Your Family from Lead Hazards

If you think your home has lead-based paint:

- Don't try to remove lead-based paint yourself.
- Always keep painted surfaces in good condition to minimize deterioration.
- Get your home checked for lead hazards. Find a certified inspector or risk assessor at [epa.gov/lead](https://www.epa.gov/lead).
- Talk to your landlord about fixing surfaces with peeling or chipping paint.
- Regularly clean floors, window sills, and other surfaces.
- Take precautions to avoid exposure to lead dust when remodeling.
- When renovating, repairing, or painting, hire only EPA- or state-approved Lead-Safe certified renovation firms.
- Before buying, renting, or renovating your home, have it checked for lead-based paint.
- Consult your health care provider about testing your children for lead. Your pediatrician can check for lead with a simple blood test.
- Wash children's hands, bottles, pacifiers, and toys often.
- Make sure children avoid fatty (or high fat) foods and eat nutritious meals high in iron and calcium.
- Remove shoes or wipe soil off shoes before entering your house.

Lead Gets into the Body in Many Ways

Adults and children can get lead into their bodies if they:

- Breathe in lead dust (especially during activities such as renovations, repairs, or painting that disturb painted surfaces).
- Swallow lead dust that has settled on food, food preparation surfaces, and other places.
- Eat paint chips or soil that contains lead.

Lead is especially dangerous to children under the age of 6.

- At this age, children's brains and nervous systems are more sensitive to the damaging effects of lead.
- Children's growing bodies absorb more lead.
- Babies and young children often put their hands and other objects in their mouths. These objects can have lead dust on them.

Women of childbearing age should know that lead is dangerous to a developing fetus.

- Women with a high lead level in their system before or during pregnancy risk exposing the fetus to lead through the placenta during fetal development.

Health Effects of Lead

Lead affects the body in many ways. It is important to know that even exposure to low levels of lead can severely harm children.

In children, exposure to lead can cause:

- Nervous system and kidney damage
- Learning disabilities, attention deficit disorder, and decreased intelligence
- Speech, language, and behavior problems
- Poor muscle coordination
- Decreased muscle and bone growth
- Hearing damage

While low-lead exposure is most common, exposure to high amounts of lead can have devastating effects on children, including seizures, unconsciousness, and, in some cases, death.

Although children are especially susceptible to lead exposure, lead can be dangerous for adults, too.

In adults, exposure to lead can cause:

- Harm to a developing fetus
- Increased chance of high blood pressure during pregnancy
- Fertility problems (in men and women)
- High blood pressure
- Digestive problems
- Nerve disorders
- Memory and concentration problems
- Muscle and joint pain

Check Your Family for Lead

Get your children and home tested if you think your home has lead.

Children's blood lead levels tend to increase rapidly from 6 to 12 months of age, and tend to peak at 18 to 24 months of age.

Consult your doctor for advice on testing your children. A simple blood test can detect lead. Blood lead tests are usually recommended for:

- Children at ages 1 and 2
- Children or other family members who have been exposed to high levels of lead
- Children who should be tested under your state or local health screening plan

Your doctor can explain what the test results mean and if more testing will be needed.

Where Lead-Based Paint Is Found

In general, the older your home or childcare facility, the more likely it has lead-based paint.¹

Many homes, including private, federally-assisted, federally-owned housing, and childcare facilities built before 1978 have lead-based paint. In 1978, the federal government banned consumer uses of lead-containing paint.²

Learn how to determine if paint is lead-based paint on page 7.

Lead can be found:

- In homes and childcare facilities in the city, country, or suburbs,
- In private and public single-family homes and apartments,
- On surfaces inside and outside of the house, and
- In soil around a home. (Soil can pick up lead from exterior paint or other sources, such as past use of leaded gas in cars.)

Learn more about where lead is found at [epa.gov/lead](https://www.epa.gov/lead).

¹ “Lead-based paint” is currently defined by the federal government as paint with lead levels greater than or equal to 1.0 milligram per square centimeter (mg/cm), or more than 0.5% by weight.

² “Lead-containing paint” is currently defined by the federal government as lead in new dried paint in excess of 90 parts per million (ppm) by weight.

Identifying Lead-Based Paint and Lead-Based Paint Hazards

Deteriorating lead-based paint (peeling, chipping, chalking, cracking, or damaged paint) is a hazard and needs immediate attention. **Lead-based paint** may also be a hazard when found on surfaces that children can chew or that get a lot of wear and tear, such as:

- On windows and window sills
- Doors and door frames
- Stairs, railings, banisters, and porches

Lead-based paint is usually not a hazard if it is in good condition and if it is not on an impact or friction surface like a window.

Lead dust can form when lead-based paint is scraped, sanded, or heated. Lead dust also forms when painted surfaces containing lead bump or rub together. Lead paint chips and dust can get on surfaces and objects that people touch. Settled lead dust can reenter the air when the home is vacuumed or swept, or when people walk through it. EPA currently defines the following levels of lead in dust as hazardous:

- 40 micrograms per square foot ($\mu\text{g}/\text{ft}^2$) and higher for floors, including carpeted floors
- 250 $\mu\text{g}/\text{ft}^2$ and higher for interior window sills

Lead in soil can be a hazard when children play in bare soil or when people bring soil into the house on their shoes. EPA currently defines the following levels of lead in soil as hazardous:

- 400 parts per million (ppm) and higher in play areas of bare soil
- 1,200 ppm (average) and higher in bare soil in the remainder of the yard

Remember, lead from paint chips—which you can see—and lead dust—which you may not be able to see—both can be hazards.

The only way to find out if paint, dust, or soil lead hazards exist is to test for them. The next page describes how to do this.

Checking Your Home for Lead

You can get your home tested for lead in several different ways:

- A lead-based paint **inspection** tells you if your home has lead-based paint and where it is located. It won't tell you whether your home currently has lead hazards. A trained and certified testing professional, called a lead-based paint inspector, will conduct a paint inspection using methods, such as:
 - Portable x-ray fluorescence (XRF) machine
 - Lab tests of paint samples
- A **risk assessment** tells you if your home currently has any lead hazards from lead in paint, dust, or soil. It also tells you what actions to take to address any hazards. A trained and certified testing professional, called a risk assessor, will:
 - Sample paint that is deteriorated on doors, windows, floors, stairs, and walls
 - Sample dust near painted surfaces and sample bare soil in the yard
 - Get lab tests of paint, dust, and soil samples
- A combination inspection and risk assessment tells you if your home has any lead-based paint and if your home has any lead hazards, and where both are located.

Be sure to read the report provided to you after your inspection or risk assessment is completed, and ask questions about anything you do not understand.

Checking Your Home for Lead, continued

In preparing for renovation, repair, or painting work in a pre-1978 home, Lead-Safe Certified renovators (see page 12) may:

- Take paint chip samples to determine if lead-based paint is present in the area planned for renovation and send them to an EPA-recognized lead lab for analysis. In housing receiving federal assistance, the person collecting these samples must be a certified lead-based paint inspector or risk assessor
- Use EPA-recognized tests kits to determine if lead-based paint is absent (but not in housing receiving federal assistance)
- Presume that lead-based paint is present and use lead-safe work practices

There are state and federal programs in place to ensure that testing is done safely, reliably, and effectively. Contact your state or local agency for more information, visit [epa.gov/lead](https://www.epa.gov/lead), or call **1-800-424-LEAD (5323)** for a list of contacts in your area.³

³ Hearing- or speech-challenged individuals may access this number through TTY by calling the Federal Relay Service at 1-800-877-8399.

What You Can Do Now to Protect Your Family

If you suspect that your house has lead-based paint hazards, you can take some immediate steps to reduce your family's risk:

- If you rent, notify your landlord of peeling or chipping paint.
- Keep painted surfaces clean and free of dust. Clean floors, window frames, window sills, and other surfaces weekly. Use a mop or sponge with warm water and a general all-purpose cleaner. (Remember: never mix ammonia and bleach products together because they can form a dangerous gas.)
- Carefully clean up paint chips immediately without creating dust.
- Thoroughly rinse sponges and mop heads often during cleaning of dirty or dusty areas, and again afterward.
- Wash your hands and your children's hands often, especially before they eat and before nap time and bed time.
- Keep play areas clean. Wash bottles, pacifiers, toys, and stuffed animals regularly.
- Keep children from chewing window sills or other painted surfaces, or eating soil.
- When renovating, repairing, or painting, hire only EPA- or state-approved Lead-Safe Certified renovation firms (see page 12).
- Clean or remove shoes before entering your home to avoid tracking in lead from soil.
- Make sure children avoid fatty (or high fat) foods and eat nutritious meals high in iron and calcium. Children with good diets absorb less lead.

Reducing Lead Hazards

Disturbing lead-based paint or removing lead improperly can increase the hazard to your family by spreading even more lead dust around the house.

- In addition to day-to-day cleaning and good nutrition, you can **temporarily** reduce lead-based paint hazards by taking actions, such as repairing damaged painted surfaces and planting grass to cover lead-contaminated soil. These actions are not permanent solutions and will need ongoing attention.
- You can minimize exposure to lead when renovating, repairing, or painting by hiring an EPA- or state-certified renovator who is trained in the use of lead-safe work practices. If you are a do-it-yourselfer, learn how to use lead-safe work practices in your home.
- To remove lead hazards permanently, you should hire a certified lead abatement contractor. Abatement (or permanent hazard elimination) methods include removing, sealing, or enclosing lead-based paint with special materials. Just painting over the hazard with regular paint is not permanent control.

Always use a certified contractor who is trained to address lead hazards safely.

- Hire a Lead-Safe Certified firm (see page 12) to perform renovation, repair, or painting (RRP) projects that disturb painted surfaces.
- To correct lead hazards permanently, hire a certified lead abatement professional. This will ensure your contractor knows how to work safely and has the proper equipment to clean up thoroughly.

Certified contractors will employ qualified workers and follow strict safety rules as set by their state or by the federal government.

Reducing Lead Hazards, continued

If your home has had lead abatement work done or if the housing is receiving federal assistance, once the work is completed, dust cleanup activities must be conducted until clearance testing indicates that lead dust levels are below the following levels:

- 40 micrograms per square foot ($\mu\text{g}/\text{ft}^2$) for floors, including carpeted floors
- 250 $\mu\text{g}/\text{ft}^2$ for interior windows sills
- 400 $\mu\text{g}/\text{ft}^2$ for window troughs

For help in locating certified lead abatement professionals in your area, call your state or local agency (see pages 14 and 15), or visit [epa.gov/lead](https://www.epa.gov/lead), or call 1-800-424-LEAD.

Renovating, Remodeling, or Repairing (RRP) a Home with Lead-Based Paint

If you hire a contractor to conduct renovation, repair, or painting (RRP) projects in your pre-1978 home or childcare facility (such as pre-school and kindergarten), your contractor must:

- Be a Lead-Safe Certified firm approved by EPA or an EPA-authorized state program
- Use qualified trained individuals (Lead-Safe Certified renovators) who follow specific lead-safe work practices to prevent lead contamination
- Provide a copy of EPA's lead hazard information document, *The Lead-Safe Certified Guide to Renovate Right*

RRP contractors working in pre-1978 homes and childcare facilities must follow lead-safe work practices that:

- **Contain the work area.** The area must be contained so that dust and debris do not escape from the work area. Warning signs must be put up, and plastic or other impermeable material and tape must be used.
- **Avoid renovation methods that generate large amounts of lead-contaminated dust.** Some methods generate so much lead-contaminated dust that their use is prohibited. They are:
 - Open-flame burning or torching
 - Sanding, grinding, planing, needle gunning, or blasting with power tools and equipment not equipped with a shroud and HEPA vacuum attachment and
 - Using a heat gun at temperatures greater than 1100°F
- **Clean up thoroughly.** The work area should be cleaned up daily. When all the work is done, the area must be cleaned up using special cleaning methods.
- **Dispose of waste properly.** Collect and seal waste in a heavy duty bag or sheeting. When transported, ensure that waste is contained to prevent release of dust and debris.

To learn more about EPA's requirements for RRP projects visit epa.gov/getleadsafe, or read *The Lead-Safe Certified Guide to Renovate Right*.

Other Sources of Lead

While paint, dust, and soil are the most common sources of lead, other lead sources also exist:

- **Drinking water.** Your home might have plumbing with lead or lead solder. You cannot see, smell, or taste lead, and boiling your water will not get rid of lead. If you think your plumbing might contain lead:
 - Use only cold water for drinking and cooking.
 - Run water for 15 to 30 seconds before drinking it, especially if you have not used your water for a few hours.

Call your local health department or water supplier to find out about testing your water, or visit [epa.gov/lead](https://www.epa.gov/lead) for EPA's lead in drinking water information.

- **Lead smelters** or other industries that release lead into the air.
- **Your job.** If you work with lead, you could bring it home on your body or clothes. Shower and change clothes before coming home. Launder your work clothes separately from the rest of your family's clothes.
- **Hobbies** that use lead, such as making pottery or stained glass, or refinishing furniture. Call your local health department for information about hobbies that may use lead.
- Old **toys** and **furniture** may have been painted with lead-containing paint. Older toys and other children's products may have parts that contain lead.⁴
- Food and liquids cooked or stored in **lead crystal** or **lead-glazed pottery or porcelain** may contain lead.
- Folk remedies, such as "**greta**" and "**azarcon**," used to treat an upset stomach.

⁴ In 1978, the federal government banned toys, other children's products, and furniture with lead-containing paint (16 CFR 1303). In 2008, the federal government banned lead in most children's products. The federal government currently bans lead in excess of 100 ppm by weight in most children's products (76 FR 44463).

IMPORTANT!

Lead From Paint, Dust, and Soil in and Around Your Home Can Be Dangerous if Not Managed Properly

- Children under 6 years old are most at risk for lead poisoning in your home.
- Lead exposure can harm young children and babies even before they are born.
- Homes, schools, and child care facilities built before 1978 are likely to contain lead-based paint.
- Even children who seem healthy may have dangerous levels of lead in their bodies.
- Disturbing surfaces with lead-based paint or removing lead-based paint improperly can increase the danger to your family.
- People can get lead into their bodies by breathing or swallowing lead dust, or by eating soil or paint chips containing lead.
- People have many options for reducing lead hazards. Generally, lead-based paint that is in good condition is not a hazard (see page 10).

Lead Poisoning Prevention Program

Notice of Tenants' Rights

INTRODUCTION

This Notice of Tenants' Rights explains your legal rights pursuant to the Maryland Reduction of Lead Risk in Housing Law, which went into effect on February 24, 1996. Under this law, property owners are required to address all potential lead-based paint hazards in rental properties constructed prior to 1950, register and annually renew registration of their properties with Maryland Department of the Environment's (MDE) Lead Poisoning Prevention Program, and provide tenants with lead educational materials. This Notice of Tenant's Rights also provides a detailed explanation of what property owners are required to do to comply with the law, how to inform your landlord that repairs need to be performed in your home, and steps you can take to enforce your legal rights if your landlord refuses to respond to your request.

Please read this material carefully and call the Lead Hotline at 410-537-4199 or 800-776-2706 if you have any questions. (TTY Users 800-735-2258)

I HAVE JUST MOVED INTO A RENTAL DWELLING THAT WAS BUILT BEFORE 1950, WHAT DO I NEED TO KNOW?

In order to be fully compliant with the law, your landlord is required to:

- 1) Give you the Notice of Tenant Rights, the EPA brochure, "Protect Your Family from Lead in Your Home," and a copy of the lead inspection certificate for the unit on or before the day you move in. The property owner may ask you to sign a statement acknowledging that you received these items.
- 2) Ensure that the property is currently registered with the Maryland Department of the Environment (MDE) and is required to pay a \$30.00 per property/unit registration fee.
- 3) Obtain a passing Full Risk Reduction certificate prior to you moving into the property.

DOES MY RENTAL DWELLING UNIT HAVE TO BE INSPECTED BEFORE I MOVE IN?

Yes. The property owner must have the unit inspected at the owner's expense. All inspections are required to be performed by an inspector accredited by MDE. If the house passes the inspection, the property owner will be given a Lead Paint Risk Reduction Inspection Certificate. This certificate will be on file at MDE. The owner is required to give you a copy of the inspection certificate when you

move in. If you wish to know the results of the inspection, ask your landlord or call the Lead Hotline at 410-537-4199, 1-800-776-2706, or TTY 800-735-2258.

ARE THERE OTHER TIMES THAT THE PROPERTY OWNER MUST COMPLY WITH SPECIAL STANDARDS WHILE I LIVE HERE?

Yes. When a child under six or a pregnant woman has an elevated blood lead level (EBL) 10 µg/dl or more, the local health department will inform the property owner of the obligation to meet the **Modified Risk Reduction Standard**.

The Modified Risk Reduction Standard must also be met when the property owner receives a written Notice of Defect that there are structural defects and/or chipping, peeling, and flaking paint in your home. Chipping, peeling and flaking paint in pre-1950 constructed rental properties is presumed to contain lead, which can be dangerous to you and your children.

The property owner will have 30 days to satisfy the Modified Reduction Standard after receipt of a written Notice of Elevated Blood Lead Level or Notice of Defect.

HOW DO I TELL THE PROPERTY OWNER ABOUT STRUCTURAL DEFECTS and/or THAT THERE IS CHIPPING, PEELING, AND FLAKING PAINT IN MY HOME?

You must send a notice to the property owner in writing. You may either write a letter or use a "Notice of Defect Form." A sample copy of the form is attached on page 5. When sending a notice, it is suggested to send it **Certified Mail, Return Receipt Requested** or **Hand Deliver** it to the property owner and obtain a signature evidencing receipt. This documentation is also useful when making a referral to MDE or your local housing department.

Once the property owner receives the notice, your property must satisfy the Modified Risk Reduction Standard within 30 days.

HOW DOES AN OWNER MEET THE MODIFIED RISK REDUCTION STANDARD?

Within 30 days after the receipt of a Notice of Elevated Blood Lead Level or Notice of Defect, the property owner provides for the temporary relocation of tenants to a lead free dwelling unit or another dwelling unit that has met the full risk reduction standard;

OR

Within 30 days after the receipt of a Notice of Elevated Blood Lead Level or Notice of Defect, the property owner ensures that the property passes a test for lead contaminated dust and by performing certain lead hazard reduction treatments. The property owner must pay for those repairs and must use a contractor accredited by MDE to perform lead abatement work.

SHOULD MY FAMILY STAY IN THE HOME WHILE REPAIRS ARE BEING MADE?

Nobody is permitted in the work area. Pregnant women and children under 6 years old are prohibited from being in the house while the lead hazard reduction treatments are being performed. If you are required to leave your house for more than 24 hours while treatments are performed, the property owner must pay for all your reasonable expenses directly related to your required relocation to temporary lead safe housing.

The property owner is also responsible for expenses related to the moving, storing, or cleaning of furniture, and possibly food costs for the family while work is being done in the home.

You must allow the property owner to enter your home to do the treatments.

The property owner is required to have the home inspected to verify the Modified Risk Reduction standard has been met. After all work is completed, an MDE accredited inspector must inspect the property to verify compliance with the Modified Risk Reduction standard.

WHAT IF MY LANDLORD HAS NOT COMPLIED WITH THE LAW, OR HAS FAILED TO RESPOND TO MY NOTICE?

1. Make a Referral

If you have given your landlord a written Notice of Defect or Notice of EBL and no repairs have been completed, you can make a referral to Maryland Department of the Environment's Lead Poisoning Prevention Program by calling 1-800-776-2706 or 410-537-3825. When making a referral, please provide copies of the Notice of Defect or Notice of EBL, along with any verification of receipt you may have.

2. Rent Escrow

Rent Escrow is a legal process that requires you to file a Complaint for Rent Escrow in the District Court in the county in which you live. If the District Court grants your request for an escrow account, you will be required to pay your rent into the District Court's escrow account instead of to your landlord. This provides an incentive for your landlord to complete repairs in your home that threaten the life, health, or safety of you and your family. In order to have an escrow account established based on lead hazards, you only need to prove that your landlord is not in compliance with Maryland's Lead Laws.

An escrow account is only established after all facts have been presented to a judge in a judicial proceeding. Therefore, it is suggested that you seek the advice and representation of an attorney.

3. Rent Protection

In 2004, the Maryland General Assembly enacted legislation requiring landlords to confirm their compliance with Maryland's Lead Risk Reduction in Housing Law when filing for repossession of property based on a tenant's failure to pay rent. If the property to be repossessed was constructed prior to 1950, the landlord must state that they are currently registered with Maryland Department of the Environment and provide the certificate number for the inspection conducted for the current tenancy. Failure to provide this information may result in the dismissal of the landlord's complaint.

4. Retaliatory Eviction

It is unlawful for your landlord to evict you for complaining about dangerous conditions present in your home, including the presence of peeling, chipping, and flaking paint. The law protects tenants against eviction and illegal rent increases initiated after notification. It is presumed that any attempt to evict a tenant or to raise the rent, except for nonpayment of rent, within two months after compliance with the applicable risk reduction standard, is in retaliation for the tenant's notification of dangerous conditions, and shall be void. It is also against the law for the property owner to evict you because there is someone in your home found to have a high blood lead level.

If you have any questions about the Maryland Lead Law, visit:
www.mde.state.md.us/lead or call the Lead Hotline at 410-537-4199 or toll-free at 1-800-776-2706, or TTY 1-800-735-2258.
